

FEDIM PIOMO MERLIN BRICE

Data Scientist, Full-Stack Developer & Instructor

WORK EXPERIENCE

→ Software engineer - Yozati - Remote

06/2025 - current

- Maintenance and expansion of a solar panel layout platform that is already in operation.

→ Instructor - CLM Academy - Yaoundé

05/2026 - current

- Instructor for the office software component of the office administration course
- Conducting training sessions
- Preparing lessons in accordance with the curriculum and learning objectives
- Designing practical exercises that allow learners to apply their new knowledge in real-world situations.

→ Developer & IA Instructor - Trust SARM - Yaoundé

06/2025 - 07/2025

- Participated in digital transformation projects by working closely with multidisciplinary teams.
- Added a chatbot module to a solution already in production.
- Served as a trainer during an AI training seminar for SMEs.

→ Instructor at the GIT Club at ENSTP of Yaoundé - Yaoundé

10/2024 - 01/2025

- Instructor for the course "Python for Data Analysis and Statistical Exploration" organized by the GIT (Innovative Engineering and Technology) Club at the National School of Public Works in Yaoundé (ENSTP).
- Facilitation of interactive training sessions on Google Meet
- Preparation of lessons in accordance with the curriculum and learning objectives
- Design of practical exercises enabling learners to apply their new knowledge in real-world scenarios.

→ Data scientist / Web developer - Centre Universitaire des Technologies de l'Information (CUTI) - Yaoundé

10/2024 - 09/2025

- Launch of an app to track teacher logins at the University of Yaoundé 1

→ Data scientist / Web developer - Caasitech Group - Yaoundé

07/2024 - 08/2024

- Participated in the AI Bootcamp program organized by Caasitech as a data scientist, AI engineer, and web developer.
- Developed a web application to predict crime rates in Maryland's judicial districts in the United States.

SKILLS

• Développement Web Fullstack

- **Frontend** : HTML5/CSS3 - JavaScript moderne (ES6+) - React JS - Next JS - Tailwind CSS - Bootstrap.
- **Backend** : Python (Django, Flask) - Node.js.
- **Databases** : PostgreSQL - MySQL - MongoDB - Supabase.
- **Outils & DevOps** : Git/GitHub - Postman - VS Code

• Data Science & Artificial Intelligence

- **Machine & Deep Learning** : R/R shiny - Scikit-learn - TensorFlow/Keras - PyTorch (CNN, RNN, LSTM)
- **IA Générative & NLP** : Integration of intelligent chatbots, use of Hugging Face Transformers (BERT, GPT), and prompt engineering.
- **Data Engineering** : Working with and Cleaning Large Datasets Using Pandas/NumPy
- **Analysis & Mathematics** : Inferential statistics, linear algebra, probability, and time series analysis (ARIMA, Prophet) - MATLAB

• Data Visualization and Business Intelligence

- **Visualizations** : Matplotlib - Seaborn - Streamlit - Gradio
- **Interactive dashboards** : Power BI - Tableau - Plotly/Dash
- **Advanced Reporting** : Advanced MS Excel
