

FEDIM PIOMO MERLIN BRICE

Tech & Data Expert | Fullstack
Developer, Data Scientist & Technical
Trainer

Currently completing my Master's degree with over 5 years of experience in technical training, I bridge the gap between fullstack development (React, Node.js, Django) and advanced Data Science (Machine Learning, Deep Learning). My unique background enables me to build intelligent, end-to-end applications, from RESTful API design to complex statistical modeling. As an experienced educator who has mentored dozens of students and professionals (ENSTP, Trust SARL), I excel at translating complex technical concepts into scalable business solutions. I am now seeking a high-impact role where I can leverage my multidisciplinary skills to drive technological innovation.

PROJECTS

- **Médecin virtuel** : Web application for detecting malaria based on images of blood smears examined under a microscope - **Academic**
- **CrimeTrend** : Web application for predicting crime rates in Maryland counties in the U.S. - **Caasitech Internship**
- **Gebi**: Online order management platform for library administration - **Personal**
- Web application for collecting and analyzing teacher login data on Google Classroom at the University of Yaoundé 1 to generate interactive dashboards (In progress) - **CUTI Internship**

EXPERIENCE

→ Software engineer - Yozati - Remote

Professional internship

06/2025 - current

- Maintenance and expansion of a solar panel layout platform that is already in operation.

→ AI Developer & Trainer - Trust SARL - Yaoundé

Professional internship

06/2025 - 07/2025

- Participated in digital transformation projects by working closely with multidisciplinary teams.
- Added a chatbot module to a solution already in production.
- Served as a trainer during an AI training seminar for SMEs.

→ Instructor at the GIT Club (Génie Innovent et Technologies) de l'ENSTP de Yaoundé - Yaoundé

Freelance

10/2024 - 01/2025

- Instructor for the course "**Python for Data Analysis and Statistical Exploration**" organized by the GIT Club (Génie Innovent et Technologie) at the École Nationale Supérieure des Travaux Publics de Yaoundé (ENSTP).
- Facilitation of interactive training sessions on Google Meet. Preparation of lessons in accordance with the curriculum and learning objectives. Design of practical exercises enabling learners to apply their new knowledge in real-world scenarios.

→ Data Scientist / Web Developer - Centre Universitaire des Technologies de l'Information (CUTI) - Yaoundé

Stage

10/2024 - 09/2025

- Launch of an app to track teacher logins at the University of Yaoundé 1

→ Data Scientist / Web Developer - Caasitech Group - Yaoundé

Apprenticeship Agreement

07/2024 - 08/2024

- Participated in the AI Bootcamp program organized by Caasitech as a data scientist, AI engineer, and web developer.
- Developed a web application to predict crime rates in Maryland's judicial districts in the United States.

EDUCATION

→ Master's in Computer Science: Data Science

University of Yaoundé 1 - **Yaoundé**

09/2024 - **Current**

→ Bachelor's Degree in Computer Science: Data Science

University of Yaoundé 1 - **Yaoundé**

10/2021 - 07/2024

→ High School Diploma

Bokito Bilingual High School - **Bokito**

09/2016 - 07/2021

- UNICEF Knowledge Management Platform: A platform designed to make documents related to children's rights available to the public, featuring an intelligent chatbot that analyzes the documents on the user's behalf and answers questions - **Trust Sarl**
- Popagi: Web application for monitoring the ripeness of papayas and sending notifications to users when their fruit in the fields is ripe - **Academic**

Japanese
Culture /
AnimeContinuing
education
and self-
directed
learningTechnical skills

- **Full-Stack Web Development**
 - **Frontend:** Proficiency in ReactJS (Hooks, state management), modern JavaScript (ES6+), HTML5/CSS3, Tailwind CSS, and Bootstrap.
 - **Backend:** Development of applications and RESTful APIs using Python (Django, Flask) and Node.js.
 - **Databases:** Design, administration, and query optimization on PostgreSQL, MySQL, MongoDB, and Supabase.
 - **Tools & DevOps:** Version control with Git/GitHub, API testing with Postman, and VS Code environment
- **Data Science & Artificial Intelligence**
 - **Machine & Deep Learning:** Design and training of models with Scikit-learn, TensorFlow/Keras, and PyTorch (CNN, RNN, LSTM).
 - **Generative AI & NLP:** Integration of intelligent chatbots, use of Hugging Face Transformers (BERT, GPT), and prompt engineering.
 - **Data Engineering:** Manipulation and cleaning of large datasets with Pandas/NumPy and implementation of ETL/ELT pipelines.
 - **Analysis & Mathematics:** Inferential statistics, linear algebra, probability, and time series analysis (ARIMA, Prophet).
- **Data Visualization & Business Intelligence**
 - **Interactive dashboards:** Creating analytical applications with Streamlit, Plotly/Dash, and designing reports in Power BI and Tableau.
 - **Advanced Reporting:** Expert proficiency in MS Excel (Pivot Tables, macros, automation).
- **Teaching Expertise & Soft Skills**
 - **Training Design:** Development of course materials and facilitation of sessions for diverse audiences (high school students, college students, professionals).
 - **Technical Communication:** Proven ability to explain complex concepts (AI, Python) to a non-technical audience.
 - **Project Management:** Analyzing complex problems, working under pressure, and collaborating across disciplines using Notion or Trello.

Soft skills

- Ability to analyze complex problems and propose effective solutions
- Excellent communication skills when working with interdisciplinary teams (developers, researchers, subject matter experts, etc.)
- Ability to explain technical concepts to a non-technical audience
- Quick learner of new technologies and ability to adapt to changing environments
- Highly motivated and eager to learn
- Ability to work under pressure and manage multiple projects simultaneously
